Press Release

Teach Your Kids How to Care About Our Planet with a New, Experiential Package that Includes a Book, an Interactive eBook and Activity Sheets

New York, NY, July 27, 2020: Green Rank, a children’s company that creates products, games, and interactive activities that combine environmental welfare with childhood imagination, this week announced they are launching a printed version of the first book in its series, “Save Our Oceans.”

“Save Our Oceans” provides a comprehensive green education package in which kids can read the book, be rewarded with cut-out certificates they can show parents and friends for green actions, and download the free companion e-book to see the characters come to life. Green Rank also has a second product in the series, “Green Our Homes”, available as free e-book. Green Rank is also including hands-on free printables for math, reading comprehension, and coloring, to further solidify kids’ green knowledge.

Both e-books in the series (winners of the Gold Award from Mom’s Choice Awards) and printables are completely free and do not include advertising.

“We believe that kids, and even adults, learn best through play, which is why all of our activities are specifically game-like and fun, while helping little children’s cognitive and fine motor skills,” said Maria Gagos, Founder and Owner of Green Rank. “With our new book – launching just on time for World Conservation Day – award-winning companion e-book, and free printables, kids can now get up-close-and-personal with some of the most important topics of today.”

Green Rank’s products are set up with age appropriate challenges and fun activities that children can do to help them get a play-element in their learning.

“Kids learn best when they are moving, touching, holding and, most importantly, playing,” said Gagos. “Loading them up with tons of dry information just doesn’t work. That’s why we are carefully crafting educational content that is actually fun for them to use. For their healthy future

on a healthy planet, we want our kids to learn today, so that they can protect our planet tomorrow.”

Believing that most people actually want to protect the earth, but don't know where to start, Green Rank works diligently to make easy-to-digest educational materials focused on recycling, greener homes, saving the oceans, and protecting the environment.
